References

Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Avoid citation in the Summary. The references should be well updated and arranged alphabetically. More than one reference from the same author(s) in the same year must be identified by the letters "a", "b", "c", etc., placed after the year of publication. Any crucial statement must be supported by reference. Reference should contain: author(s) last name(s) followed by initials, year, full title, journal's full name (in italics), volume number (in bold), issue number (in bracket) and inclusive page numbers. Only surname of the authors should be included e.g., Sharma and Johnson (2005). If a paper has three or more authors then it should be referred as surname of the first author followed by *et al.* e.g., Negi *et al.*, (2011). Please avoid using footnotes.

All the references to be given at the end of the chapter. Reference of the review matter [text/figure] taken from any source must be given due credit and its Reference must be written in the **REFERENCES** section. Author must have the necessary permission of publication of figures and photos taken from other sources [not author's own work] submitted in the chapter.
